

Registration

NYU International Implantology Week

March 1 – 5, 2010

Course Overview

This 5-day, interactive, advanced-level educational experience will cover state-of-the-art surgical case planning, effective and innovative regenerative procedures and techniques, simple to complex implant surgeries (including live surgery demonstrations), and will culminate with comprehensive, current restorative procedures and techniques. Internationally known faculty coordinated by program chair Dr. Edgard El Chaar, Clinical Assistant Professor, will highlight advancements within the field of dental research, the latest implant dentistry tools, products and resources, and provide practical solutions that help the dental practitioner provide optimal, cost effective oral rehabilitation outcomes for their patients.

CE Credits (Through NYU Linhart Continuing Dental Education): Attendees at this course may earn up to 30 CEUs
